

RENEWABLE ENERGIES

Transformers High Energy Efficiency **ECOdesign**

Auxiliary transformers
Protected transformers
AC-DC Suppliers

TRANSFORMERS

- Safety, isolating and control single-phase transformers from 10VA to 40kVA, special power on request
- Dry-type LV-LV three phase impregnated or cast-resin power transformers from 1kVA to 2000kVA
- MV-LV single/three phase distribution, excitation, earthing transformers up to 3150kVA class 24kV
- Three/single phase with dispersed flux, LV-LV with high insulation, autotransformers for starting motors
- For wind power and photovoltaic plants, shelters for telecommunications
- For railway, substation and rolling

STABILIZERS

- Electrodynamic type, single/three phase for balanced/unbalanced loads up to 600kVA

REACTORS

- Smoothing, starting motors, for limiting short circuit current

SPECIAL PRODUCTS

- AC-AC and AC-DC suppliers
- UPS, rescuers, battery charges
- Harmonic filters
